#### Intensive Academic English Course Pre-sessional Programme Listening Assessment –2009

1. Before you listen, read this introductory text, which will help orientate you to the subject matter of the listening text, giving you general and background information. You have 2 minutes.

The excerpt from the lecture you are about to listen to has been taken from a module offered by the School of Arts and Education at Middlesex University in 2006 and is called **Exploring Communication and Media.** The module explores different forms of media and it analyses the language – or discourse – of media communication in all its forms. This enables us to understand the various ways in which important social topics and issues are presented and to develop critical awareness of how public perception and opinion are shaped by media texts, forms and organizations.

The section you are about to hear offers an overview of advertising and promotional language and aims to develop skills in analysing the communicative techniques used in different kinds of advertisement.

Before you listen, think about the topic of <u>Advertising</u>. What would you

| expect to hear in a lecture on this topic? You have 2 minutes to note down your ideas. |  |  |  |  |  |  |  |

#### Section 2 (15 marks)

You will listen shortly to the following extract from the lecture and then fill the gaps with ONE word only.

Before you listen, you will have <u>three minutes</u> to read the text first and predict possible words.

You will hear the extract <u>twice</u>. After the second time, you will have <u>two minutes</u> to complete your answers.

| Let me begin, then, with some, er, general points about advertising, which, obviously, you |   |  |  |  |  |  |  |  |  |  |
|--|---|--|--|--|--|--|--|--|--|--|
| can read up, er, afterwards, but, ah, which, ah, I'm going to just 1 to here, so I'm       |   |  |  |  |  |  |  |  |  |  |
| not giving you a detailed 2, I'm just pointing to various things. Let's start with         |   |  |  |  |  |  |  |  |  |  |
| the 3 assumption that advertising is universal, that, wherever you go in the               |   |  |  |  |  |  |  |  |  |  |
| 4, there is advertising, and it's an essential and 5 part of the                           |   |  |  |  |  |  |  |  |  |  |
| world that we live in. I would ask you to <b>6.</b> that, ah, assumption just a bit.       |   |  |  |  |  |  |  |  |  |  |
| Obviously you can question it <b>7.</b> So if you go back 200 years, the                   |   |  |  |  |  |  |  |  |  |  |
| 8of advertising was very, very different. If you go back 9                                 |   |  |  |  |  |  |  |  |  |  |
| years and it was very different again (coughs). So, like all things with 10,               |   |  |  |  |  |  |  |  |  |  |
| as soon as you look to 11 period, you find that things are very different, and             | b |  |  |  |  |  |  |  |  |  |
| the inference that you need to 12 from that is of course, ah, that, er, somethin           | g |  |  |  |  |  |  |  |  |  |
| that differs 13 times is not, er, universal and 14 the case.                               |   |  |  |  |  |  |  |  |  |  |
| More importantly for our purpose, let's just think about the <b>15.</b>                    |   |  |  |  |  |  |  |  |  |  |
|  |   |  |  |  |  |  |  |  |  |  |
|  |   |  |  |  |  |  |  |  |  |  |
